- annotating visuals, 29
- APA style, 25
- arguments in dict, 146
- axis title, 27

- background, 46
- barplot, 72, 85, 93, 103
- barplot (**R**), 26
- bigrams, 246, 248
- bivariate association, 110
- bivariate association between one categorical and one numerical variable, 131
- bivariate association between two categorical variables, 111
- Boolean data values (**Python**), 16
- Boolean type values, 15
- bounding box, 215
- boxplot, 93
- Brewer palettes, 37, 41, 121

- cartogram, 228
- categorical variables, 13
- category type values (**R**), 14
- ceiling, 99
- centrality measures, 263
- centroid of polygon, 229
- changing EPSG in maps, 213
- changing size in maps, 217

- character type values (**R**), 13
- Choropleth map, 218
- code object (**R**), 25
- color, 36
- color for nominal values, 36
- color for numeric values, 39
- color for ordinal values, 38
- color intensity, 170
- colorblind safe color, 41
- coloring graph links, 261
- coloring graph nodes, 261
- coloring maps, 217
- communities in networks, 269
- computing median (**Python**), 92
- computing median (**R**), 92
- constant, 18
- contingency table, 111
- Cook distance, 157
- coordinate system, 195
- correlation, 151
- correlation analysis, 151
- count data values, 15
- create break points, 222
- crosstab, 111
- cutting data: equal intervals, 222
- cutting data: Head-Tails method, 222
- cutting data: Jenks method, 222
- cutting data: quantiles, 222

- data aggregation, 151, 203
- data for maps, 193
- data for maps: addresses, 193
- data for maps: administrative units, 193
- data for maps: coordinates, 193
- data for maps: segments (roads, etc.), 193

- data frame, 17
- data intervals, 103
- data type, 11
- data type: Boolean, 12
- data type: categories, 11
- data type: date, 12, 140
- data type: missing values, 12
- data type: numerical, 12
- data type: text, 11
- data–ink ratio, 47, 72
- date values, 16
- date-formatting symbols, 141
- degree centrality, 263
- density plot, 164
- dependent variable, 111
- dictionaries, 22
- dictionaries (**Python**), 101
- dimensionality reduction, 167
- directed relationship in graph, 256
- disconnected nodes (isolates), 269
- discretizing values for maps, 220
- dispersion, 96
- dissolving maps, 206
- diverging color scheme, 40, 41
- diversity, 83
- dodged barchart, 112
- dodged barchart (**Python**), 116
- dot shapes (**R**), 33
- dots, 33
- double data values (**R**), 15
- drop unused categorical levels, 148, 173

- edge list, 20
- emoticons in tweets, 240
- EPSG, 211
- erasing elements, 52

- facet grid, 168
- facet wrap, 168
- facet_grid, 128, 151
- facets, 128, 168, 184
- Factor type values (**R**), 14
- figure and axes (**Python-matplotlib**), 162
- fixing projection issues, 213
- flattening object (**Python**), 249
- float data values (**Python**), 15
- formatting date data, 141
- formatting ordinal data, 91, 112
- frequency table, 55, 92
- frequency table of bigrams, 249
- frequency table of words, 244

- gap, 70

- lines, 34
- link of graph (n-gram), 251
- loess*, 143
- logical data values (**R**), 15

Lollipop plot, 74
 long format, 19, 116, 171
 loop, 163
 Lorenz curve, 105
 Luvain algorithm for community detection, 272

map bounding box, 195
 maps, 23
 margins of plot, 51
matplotlib, 253
 measurement data values, 15
 median, 91
 merging data into maps, 201
 missing values, 16
 Mizani library (**Python**), 121
 mode, 84
 modularity maximization, 270

Neato layout, 261
 negative/positive correlation, 156
 network layout, 259
 network of words, 248
 networks, 20
networkx, 259
networkx structure (**Python**), 258
 node of graph (word), 251
 nominal variable values, 14
 normal distribution, 103
 North arrow for maps, 233
 NoSQL, 22
 numeric data values, 102
 numeric data values (R), 15
 Numpy (**Python**), 86

ordered type values (R), 14
 ordinal variable values, 14, 90, 91
 outlier detection, 99
 outliers, 98, 158

Parallel lines plot, 177
Pareto Chart, 88
 Pareto Principle, 85
 photocopy friendly color, 41
 pickle file format, 62
 pie chart, 74
Plotly, 184
Plotnine (**Python**), 61
 polar coordinates, 183
 polygons, 34
 position, 91

projection of map, 195
 punctuation, 242

qualitative color scheme, 37
 quantiles, 92

radar plot (*Plotly*), 185
 radial plot, 182
 range of values, 183
 raster, 164
 ratio scale values, 15
 raw values, 69
 regular expression, 172, 240
 reorder geometries (R), 113
 representativity, 78
 reprojecting map, 211
 resample (**Python**), 145
 reshaping, 171, 172
 resizing graph nodes, 263
 resizing map polygons, 227
 reversing color sequence, 225
 ridge plots, 151

scale bar for maps, 233
 scatter plot, 153
 sequential color scheme, 38
 shape, 102
 shapefile, 193, 194
 shapefile to *geojson*, 196
 shrinking legend in map, 218
 simplify map, 197
 sliver polygons, 206
 social actor, 256
 social network, 236
 solving dot overplotting, 158
 source, 28
 spatial heatmap, 230
 spatial points, 209, 230
 splitting a column in data frame, 249
 spring layout, 253
 stacked barplot, 117
 standard deviation, 99, 103
 stop words, 243
 stress layout, 268
 string type values (**Python**), 13
 string type values as Object type (**Python**), 13
 subsetting data frames, 148
 subtitles, 25
 symmetry, 91

- tables, 19
- text data values, 13
- text repelling, 157, 163
- the *Moiré Effect*, 79, 85
- threshold value, 70
- ticks in plot axis, 52
- timestamp (**Python**), 149
- title of visual, 25
- tokenizing, 242
- TopoJson, 23
- traces (*Plotly*), 185
- tree layout, 254
